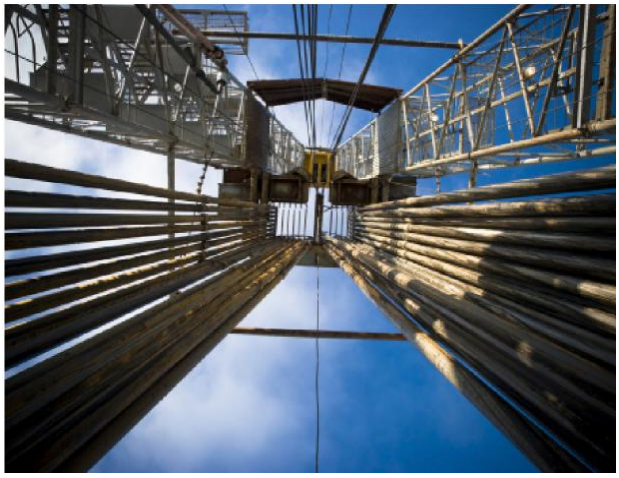
EHS Support is an environmental engineering consulting company with over 70 offices across Australia, New Zealand, North America, Europe and South Africa. The Australian operations (EHS Support Pty Ltd) is headquartered in Melbourne, and has offices throughout Victoria, Queensland and Western Australia.

EHS Support has a history of supporting oil and gas companies in their upstream, midstream, and downstream developments and operations. We are an outcome-focused organization that knows the importance of schedule in oil and gas projects. Our industry-recognized technical staff have experience in all phases of oil and gas, having worked in non-traditional consulting areas such as:

- Concept and field development planning
- Operational evaluations and performance improvements
- Operational Economic and Risk analysis
- Water and Produced Water Management
- Internal Plan and Procedure development



The EHS Support Advantage

Oil and Gas projects are a core business for EHS Support. We have experience working on small ($50 million) and 'mega' ($50 billion) oil and gas development projects in both the US and internationally. What sets EHS Support apart from our competitors is that we understand all phases of the development project and anticipate our clients' needs, adding value beyond the scope of the project. We are an advocate for our clients and we have a history of successfully navigating the regulatory hurdles involved with oil and gas projects.

If you demand technical expertise, excellent communication, on time and on target project delivery at the best overall cost, you will be happy you chose EHS Support.

WATER RESOURCES MANAGEMENT & MONITORING

- Water management plans
- Baseline assessment plans
- Groundwater monitoring strategies, plans, and procedures
- Groundwater impact assessments
- Groundwater modeling
- Groundwater and surface water sampling

OPERATIONAL STUDIES

- Gas well and water well failure risk assessment
- Concept and Upstream Field Development Planning and optimization
- Managed Aquifer Recharge Projects
- Hydraulic Fracturing Risk Assessments
- Underground Gas Storage Risk Assessments Drilling Waste Management
- Groundwater and Underground Gas Leakage modeling
- Water Reuse Studies

HEALTH AND SAFETY

- EHS program and policy development and implementation
- EHS audit program development and implementation
- Third party EHS Audit services
- Accident reduction programs
- Behavior (performance) based safety incentives
- OSHA record-keeping

ENVIRONMENTAL COMPLIANCE & AUDITING

- Spill Prevention Control and Countermeasure (SPCC) plans
- Storm Water Pollution Prevention Plans (SWPPPs)
- Erosion and Sediment Control Plans (ESCP)
- Compliance guidance and training
- Supply chain compliance with EHS regulations
- On-call support for compliance programs
- Audit program design and implementation
- Corporate audit program design and support

M&A/DUE DILIGENCE

- Multidisciplinary site evaluations of commercial and industrial facilities
- Remediation strategies and transactional cost estimates for soil, water, waste, and facility contamination
- ASTM Phase I Environmental Site Assessments
- Phase II Site Investigation Activities
- Site modeling, data acquisition, and information management
- National and international staff and resources for immediate deployment
- Centralized project management
- Board of Director presentations and transactional negotiation experience

ENVIRONMENTAL APPROVALS & PERMITTING

- Air
  - Pre-construction permits
  - Operating permits
  - Risk Management plans
- Water
  - Water Allocation and Water Interception Permits
  - Wastewater treatment, collection, and disposal system permits
  - NPDES permits for discharge to surface water
  - Underground injection wells
- Solids and Hazardous Wastes registration and permitting
- Ecological and natural resource assessments for threatened and endangered species, wetlands, forest lands and wilderness areas, scenic and wild rivers, and agricultural/grazing land

SITE ASSESSMENT & REMEDIATION

- Environmental site investigations
- Human health and ecological risk assessments
- Soil and groundwater remediation options assessment
- Detailed remediation system design
- Remediation implementation and management
- Operations, maintenance, and monitoring

EHS Support delivers specialized technical services to provide our clients with innovative and cost-effective solutions for oil and gas. Contact: Tom.Silverman@ehs-support.com or Nigel.Goulding@ehs-support.com to learn more.
