Collaborative thinkers. Consultants who serve. Leaders who listen. That's the essence of EHS Support Canada. It's why our clients keep coming back to us time and time again, and it's why we're confident when we say we're the best at what we do. Our culture of excellence shows in how we lead, build, and serve. We're always looking for better, more efficient ways of doing things as we strive to provide value to our clients.

At EHS Support Canada, our clients are respected partners. We work hard to build long-term relationships with every company we serve. We won't waste your time offering cookie-cutter or short-term solutions. We ask the tough questions first and listen to your answers, so we can fully understand your unique problems, concerns, and goals. Then, we work closely with you to turn that insight into practical, cost-effective, long-term solutions. It's a comprehensive, big-picture approach. One that's focused on advocacy and on defining your needs. And it enables us to determine the best, most effective path forward for your business. **The bottom line: We're here to serve you.**

SERVICES WE OFFER

Excellence. Innovation. Work Ethic. Integrity. At EHS Support Canada, these aren't just words, they're a way of life. We focus on hiring and retaining talented, motivated people who enjoy collaborating with and delivering value to our clients. Our team does more than just identify problems—we provide solutions.

Management Systems & Compliance
Our experts work with clients to integrate EH&S management in an organization and make compliance a cultural component of businesses. We help you develop a culture where management systems and audits are not about finding fault, but about driving continuous improvement.

EH&S Auditing
We understand that people, processes, and equipment must effectively interact to deliver exceptional operational performance. By providing shared learnings from other industry sectors, our experts engage facility and project teams in the audit programs, helping you foster a culture of continuous improvement.

Health & Safety
Whether it's ensuring a safe work environment for our employees and contractors or protecting the environments and the communities in which we operate, we're always looking for ways to improve and streamline our H&S performance—and we can do the same for you.

Site Investigation and Remediation
We understand that remediation strategies require a definitive cost and implementable plan to achieve closure. We focus on quantifying environmental issues in business terms while managing the real and perceived risks. We make sure to listen first so that we can custom tailor the work scope and product to your specific needs.

CANADIAN-BASED ADVANTAGE

At EHS Support Canada, we do just about everything differently- from the way we approach new challenges, to how we collaborate with clients, to how we treat our employees. It's a culture of excellence you won't find anywhere else.

People Doing Business with People

EHS Support Canada provides pragmatic, applicable solutions with an unmatched level of quality and personal attention. Sounds impressive, right? But when you do away with all the fancy buzz words, what truly sets us apart is how we treat people. We appreciate the human element of doing business. This people-first mindset drives the decisions we make and the solutions we develop. As a client, you benefit from our technical expertise backed by first-class customer care. We don't just offer solutions, we partner with you and work hard to develop a long-lasting relationship based on trust and one that will provide value for years to come.

THE EHS SUPPORT CANADA DIFFERENCE

When you choose to partner with EHS Support, you gain a team of knowledgeable, dedicated, passionate people working around the clock to help you achieve your goals. We've got your back, and we're in it for the long haul.

We are committed to:

- Taking a comprehensive, big-picture approach to your specific needs so that we can determine the best, most effective path forward.
- Planning for the unknown, understanding that no problem or solution is as clear-cut as it seems.
- Working hard to understand not only your specific challenge but also its immediate and long-term implications.
- Determining the root cause of the problem rather than offering temporary solutions.
- Always giving you the best team for your project and never treating you as just another revenue source.

We call it the EHS Support Way, and it's a unique way of doing business—one that's focused on service and providing value. Plain and simple, we put our clients first and profit second. It's just the way we like to work.

We think you'll like it too.
