We do it all through a diversity of experts in the fields of engineering, science, geology, and health and safety, with people who, through years of experience, understand facility and business operational requirements. It all starts with a unique type of corporate culture—one focused on excellence and continuous improvement—that serves as the foundation for everything we do. We listen to our clients, making sure we truly understand their business needs and goals so we can provide value right from the start.

THE EHS SUPPORT APPROACH

Environmental, health, and safety (EH&S) consulting is about more than just providing answers. It's about listening to your needs, concerns, and goals; identifying the opportunities and potential risks; proactively relying on our experiences to bring you additional perspective; and then quantifying it all in practical business terms.

We've successfully completed projects in over 100 countries—from due diligence and auditing to health and safety and remediation. Our experts bridge the gap between science and business, helping you understand how EH&S decisions will affect your bottom line. We assess the environmental risk and what opportunities exist and then develop customized solutions to match your business needs. And, of course, everything we do is done with a value-driven focus. We always strive for efficiency, making sure to respect your valuable time and keep costs to a minimum.

It's a simple, clear-cut process, but one that we do better than anyone else in the industry. Period.

THE EHS SUPPORT ADVANTAGE

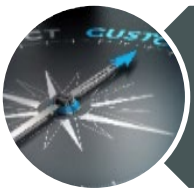
At EHS Support, we do just about everything differently—from how we approach new challenges, to how we work with our clients, to how we treat our own employees. It's a culture of excellence you won't find anywhere else.

People Doing Business with People.

Consulting is about people helping people. EHS Support provides pragmatic, applicable solutions with an unmatched level of quality and personal attention.

Global Reach, Local Expertise.

EHS Support is a global company in the truest sense of the word—with experts based throughout the United States, Canada, Australia, New Zealand, the United Kingdom, and South Africa.



A Culture of Listening.

We listen to learn. When you're in the business of people, nothing's more important than good communication.

First-Class Consultants.

The best consultants don't just offer solutions. They question. They listen. They strive to learn something new every day as they work to become indispensable partners to the clients they serve.

OUR COMMITMENT TO YOU

Our clients are respected partners. We work hard to build long-term relationships with each and every company we serve. We ask the tough questions first and listen to your answers, so we can fully understand your goals, unique problems, and concerns. Then we use that information to provide practical, cost-effective, long-term solutions.

It's a comprehensive, big-picture approach—one that's focused on advocacy and defining your objectives. And it enables us to determine the best, most effective path forward for your business.
